## WHY CHOOSE SYSTEMAIR VENTILATION SOLUTIONS?

*Engineered for Healthy Indoor Air, Built for Efficiency, Trusted Worldwide.*

### What Sets SystemAir Apart:

#### Energy-Efficient HVAC Solutions

Develops products focused on sustainability, low operational costs, and energy-efficient performance across a wide range of applications.

#### Quiet & Reliable Operation

Many products are designed for low-noise performance while maintaining high airflow efficiency and long-term reliability.

#### Certified Performance

Supported by certifications and testing programs including AMCA, Eurovent, and HVI certified performance programs.

#### Reliability

Emphasizes environmentally responsible HVAC technologies including low-GWP refrigerants, energy recovery systems, and sustainable ventilation design.

### SystemAir at a Glance:

For more than 50 years, Systemair has delivered sustainable, energy-efficient HVAC and ventilation solutions for commercial, industrial, residential, healthcare, education, hospitality, and infrastructure applications worldwide. Systemair focuses on delivering fresh, clean, and healthy air through products that are simple to select, easy to install, and reliable to operate. Systemair's broad portfolio includes fans, air handling units, air distribution products, fire safety equipment, chillers, heat pumps, and residential ventilation systems designed to improve indoor air quality while supporting energy-efficient building operation.

## Air Handling Units

Systemair's air handling units are designed to provide energy-efficient ventilation and climate control across commercial, industrial, healthcare, and educational facilities.

### Topvex

- Compact air handling units designed for easier installation and efficient ventilation performance in commercial buildings. Available in several configurations including rotary, counterflow, and compact units.

### Geniox

- Highly flexible modular air handling units engineered for low operational costs, energy savings, and long service life. Geniox systems are designed for large-scale and demanding HVAC applications.

### ERV-RT

- Light commercial ERV systems designed to deliver fresh filtered air while recovering energy from exhaust air streams.

## ChangeAir Indoor Air Quality Solutions

Systemair's ChangeAir products are designed to improve indoor air quality through portable and ceiling-mounted air purification solutions.

### ChangeAir 100 Series

- Portable air purification systems designed to improve indoor air quality in schools, healthcare facilities, offices, and commercial environments.

### ChangeAir Ceiling Mounted Units

- Ceiling-mounted indoor air quality solutions designed for discreet installation and continuous air treatment.
