

WHY CHOOSE TUTTLE & BAILEY?

*Engineered for Performance,
Built for Reliability, Trusted
for Over 175 Years.*

What Sets Tuttle & Bailey Apart:

Proven Industry Experience

With roots dating back to Brooklyn, New York in 1846, Tuttle & Bailey has more than a century of experience in commercial air distribution solutions.

Engineered Performance

Products are tested in accordance with ANSI/ASHRAE standards and supported by published performance data for specifying engineers and contractors.

Wide Range of Specialty Solutions

From security grilles to critical environment diffusers and underfloor air distribution products, Tuttle & Bailey offers engineered solutions for demanding applications.

Flexible Architectural Design

Designed to either blend seamlessly into architectural spaces or complement modern interior aesthetics while maintaining HVAC performance.

Tuttle & Bailey at a Glance:

Founded in 1846, Tuttle & Bailey is one of the most established names in the air distribution industry. Known as “The First Name in Air Distribution,” the company manufactures commercial grilles, registers, diffusers, terminal units, and specialty air distribution products designed for high-performance HVAC applications. Today, Tuttle & Bailey offers one of the industry’s most complete lines of air distribution products, serving commercial buildings, healthcare facilities, education, industrial projects, hospitality applications, and specialty environments around the world.

Grilles & Registers

Tuttle & Bailey's grille and register product line is designed to provide efficient airflow control, pattern adjustment, and long-term HVAC performance across commercial and institutional applications.

Steel Supply & Return Grilles

Heavy-gauge steel grilles and registers designed for supply and return air applications with adjustable blade configurations for airflow control.

Aluminum Grilles & Registers

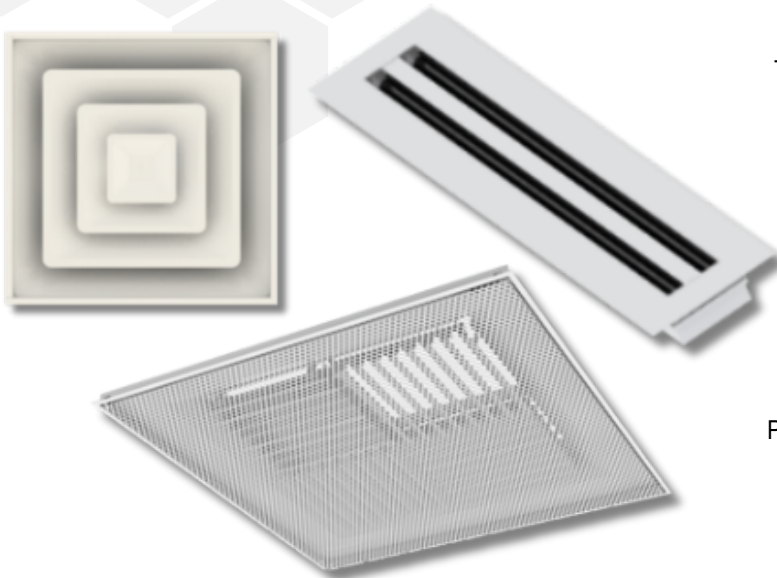

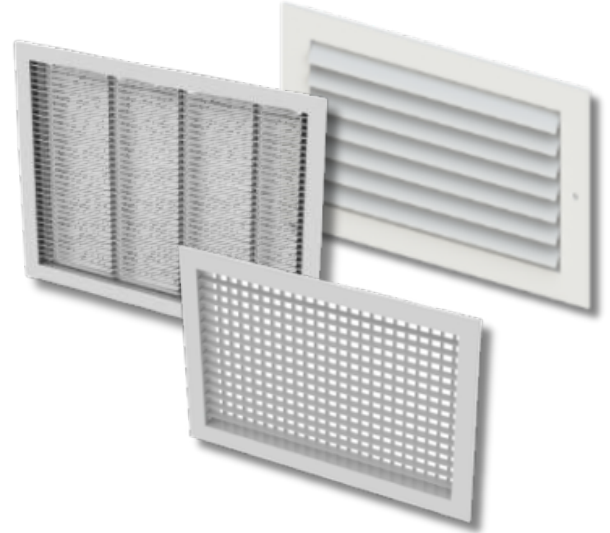

Extruded aluminum grilles designed for lightweight durability, flexible airflow adjustment, and architectural applications.

Heavy Duty Grilles

Heavy-duty steel and aluminum grilles engineered for industrial and demanding commercial environments.

Security Grilles

Security-focused ventilation products designed to resist tampering and support correctional, institutional, and secure facility applications.

Diffusers & Air Distribution

Tuttle & Bailey offers a broad selection of diffusers engineered for precise airflow control, occupant comfort, and architectural flexibility.

Square & Round Diffusers

Air distribution products designed to support efficient room air mixing and flexible HVAC layouts.

Linear & Slot Diffusers

Architectural diffusers designed for modern commercial spaces requiring streamlined appearance and high-performance airflow control.

Perforated & Displacement Diffusers

Products engineered for quiet operation, improved indoor comfort, and optimized air distribution performance.

Drum & Jet Diffusers

High-capacity airflow products designed for large open-area and industrial applications.

Specialty Products & Accessories

Tuttle & Bailey manufactures specialty airflow products and accessories designed to support complete HVAC air distribution systems.

Critical Environment Products

Diffusers and grilles designed for healthcare facilities, laboratories, and controlled environments requiring precise airflow performance.

Thermal VAV Diffusers

Self-regulating diffusers designed to adjust airflow based on room temperature conditions.

Underfloor Air Distribution

Diffusers designed for raised floor HVAC systems and flexible workspace applications.

Accessories & Support Products

Tuttle & Bailey also offers terminal units, dampers, filters, frames, and airflow accessories designed to support complete air distribution systems.
