

Water-Tube

High-Efficiency, Low NOx, Commercial-Grade Performance

HYDRONIC AND DOMESTIC HOT WATER

KEY FEATURES

- Stainless Steel, Cupro Nickel, or Copper Fin Heat Exchangers
- Built-in Sequencing Control Systems
- Low-NOx Certified (<20 ppm)
- CASCADE-ready systems
- Outdoor-rated enclosures available

MODELS

DynaFlame
DynaForce
DynaMax

SIZES

400 MBH – 6,000 MBH

TYPES

Condensing
Near & Non-Condensing
Natural Gas, Propane, Dual Fuel
Fully Modulating Burners

TYPES

High-Efficiency
Condensing Fire-Tube
Natural Gas or Propane

SIZES

80 MBH – 6,000 MBH

MODELS

Avenger
VTech (water heater)

Fire-Tube

Proven Durability with Modern Efficiency

HYDRONIC AND DOMESTIC HOT WATER

KEY FEATURES

- Flexible configurations to meet specific application needs
- Advanced control systems for precise operation
- Modular design for scalability
- Thermal Efficiency up to 96%
- Up to 40:1 Turndown

Electric Hot Water

Zero Emissions. Maximum Control. Minimal Footprint.

HYDRONIC AND DOMESTIC HOT WATER

KEY FEATURES

- PID Control Loop
- Integrated Safety Chain (temp. high limit, no flow condition, plus more)
- Power Monitoring
- Remote Operation (BMS)
- VFD Pump Control

TYPES

Electrode and
Resistance-Type
SCR or Magnetic
Contactor Control

MODELS

90 kW; 180 kW; 270 kW;
360 kW; 450 kW; 540 kW
All available in 240, 480
or 600 volts

Need Help Sizing or Selecting?

Whether you're designing a new system or replacing an old one, we're here to help you size, select, and budget. From pricing to final specs, our team supports your project every step of the way.

Water-Tube Boilers

Non, Near & Fully Condensing

High-Efficiency Hydronic Heating Solutions

Engineered for high capacity and fast response. IPremium heat transfer, compact footprints, and thermal efficiency up to 99%.

✓ Options & Features:

- Fully modulating burners
- Dual Fuel
- Low NOx emissions
- Thermal efficiencies up to 99%
- Compact, service-friendly designs

Applications: Retrofit & New Construction; Institutional, Industrial and/or Commercial

Fire-Tube Boilers

Condensing

Dependable & Serviceable for Long-Term Performance

These condensing boilers are optimized for durability and ease of maintenance. Camus fire-tube models provide exceptional reliability and proven technology.

✓ Options & Features:

- Fire-tube design for maximum heat retention
- Dual Fuel
- Modulating combustion controls
- Low-NOx and high-efficiency

Applications: Retrofit & New Construction; Institutional, Industrial and/or Commercial

Electric Boilers

Clean, Quiet & Emissions-Free Heating

The Ampron Series is a fully electric boiler for hydronic heating commercial applications.

Applications: Clean energy retrofits, facilities with electric utility incentives, all-electric buildings, Low gas pressure

✓ Options & Features:

- Optional PLC and HMI with integrated power monitoring module
- Optional SCR (Silicone Controlled Rectifier) for infinite modulation
- Vertical heat exchanger with heating elements that are easily replaceable
- Heating element bundles are equipped with spacers to ensure no element hot spots
- A novel baffle design which;
- Increases water velocity along the heating elements for element longevity
- Ensures even flow around the elements to ensure even temperature distribution across the tank

JJM Alkaline Neutralization Kits

Protect your drain lines and meet code with JJM's compact, easy-to-install condensate neutralizers. Engineered for today's high-efficiency boilers, these kits safely raise the pH of acidic condensate before disposal—extending equipment life and supporting safe, environmentally responsible operation.

✓ Options & Features:

- Pre-filled with pH-boosting media
- Models for wall-hung or floor-mounted boilers
- Clear canisters for easy inspection
- ASME A112.1.2 compliant
- Simple media replacement and maintenance

Code-Compliant Exhaust Systems

Security delivers high-performance venting solutions designed for high-efficiency boilers and water heaters. Their sealed, corrosion-resistant systems handle the demands of condensing appliances and simplify installation in tight mechanical rooms.

✓ Options & Features:

- Positive pressure venting (Category I–IV)
- Gasketed joints for fast, leak-free assembly
- UL1738 listed for boiler and water heater exhaust
- Modular systems for single or multi-boiler stacks
- AL29-4C stainless steel for condensing gas appliances
