

WHY CHOOSE WILO PUMPS?

Efficiency.
Intelligence.
Reliability.

What Sets Wilo Apart:

Smart Technology

Adaptive controls and Bluetooth connectivity for simplified setup and system optimization

Energy Savings

Advanced ECM motors and intelligent logic reduce operating costs

Application Flexibility

In-line, end-suction, booster, and split-case pump options

Reliable Build Quality

German engineering and rugged USA construction for long service life

Explore the Wilo Family:

American-Marsh

One of the oldest pump manufacturers in the U.S., American-Marsh provides end-suction, split-case, and vertical turbine pumps for commercial, fire protection, and industrial markets.

Scot Pumps

High-efficiency, close-coupled centrifugal pumps made in the USA. Scot focuses on simple, high-quality designs that are easy to maintain and built to last.

Plad Pumps

Specializing in custom, durable HVAC pumps built for tough conditions. Plad is known for short lead times and flexibility with bronze-fitted, all-bronze, and stainless-steel options.

Wilo USA

offers smart, energy-efficient pumping solutions including ECM circulators, inline pumps, and digital control technology. Designed for commercial HVAC applications, Wilo pumps deliver reliable performance in primary and secondary hydronic loops, zone pumping, and integrated system control.

Smart Circulators

Circulators

In-line

Submersible Sewage

Submersible Groundwater

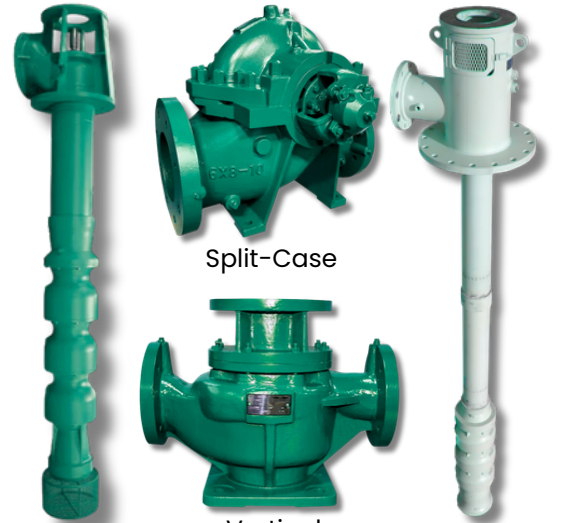

End-Suction

Split Case

Booster Systems

Fire Pumps

Split-Case

Vertical Inline

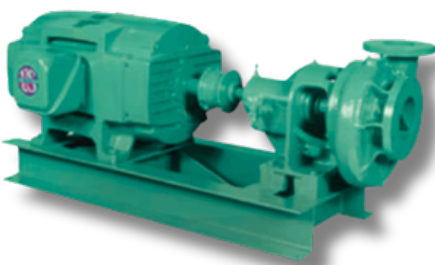

Vertical Turbine

American-Marsh

is a trusted manufacturer of fire protection pumping systems, offering UL-Listed and FM-Approved fire pumps designed for reliable performance in life-safety applications. Their lineup includes horizontal split-case, vertical turbine, vertical inline, and end-suction pumps built to meet NFPA standards for industrial and municipal facilities. Known for quality and dependable operation, American-Marsh is a strong choice for fire suppression systems where reliability and code compliance are critical.

PLAD Pump

provides industrial multi-stage and large-capacity centrifugal pumps for high-volume hydronic and industrial applications. Commonly used in central chilled and hot water loops, Plad pumps are built for high flow, high pressure, and long-term durability in engineered and large-scale systems.

Base Mounted End Suction

Vertical In-Line

Direct-Coupled

Stainless Steel

MotorPump Cast Iron

Scot-Pump

offers durable centrifugal pumps designed for agricultural and irrigation applications. The electric-powered MotorPump (available in stainless steel or cast iron) provides a compact, close-coupled solution that delivers consistent pressure with low maintenance. Together, these models provide reliable water movement for agricultural operations of all sizes.
