

## WHY CHOOSE DURAVENT?

***Engineered for Safety, Built for Reliability, Trusted Across Commercial & Industrial Applications.***

### What Sets Duravent Apart:

#### **Industry-Leading Experience**

The Duravent Group portfolio includes brands with decades of proven performance in venting, chimney, and building access industries.

#### **Wide Range of Commercial Solutions**

From chimney and grease duct systems to roof hatches and access doors, Duravent Group products support a broad range of building applications.

#### **Innovation-Driven Engineering**

Duravent pioneered several venting technologies and continues developing solutions focused on installation efficiency, durability, and long-term performance.

#### **Engineered for Safety & Compliance**

Products are designed and tested to meet UL and ULC certification standards for commercial and residential applications.

## Duravent Venting Systems

Founded in 1956, Duravent has become a leader in engineered venting systems for residential, commercial, and industrial applications.

### DuraStack® Pro

Modular double-wall positive pressure chimney systems designed for boiler breeching, stack applications, engine exhaust, and grease duct systems.

### PolyPro® Flex

Polypropylene venting systems designed for high-efficiency appliances including condensing boilers, furnaces, and water heaters.

### PelletVent Pro®

Biofuel venting systems designed for pellet stove and biomass appliance applications.

## Security Chimneys

Security Chimney is recognized for UL and ULC-certified chimney systems engineered for dependable performance and safety.

### Commercial Chimney Systems

Factory-built chimney systems designed for commercial heating equipment, grease duct, and specialty exhaust applications.

### Residential Chimney Systems

High-temperature chimney systems engineered for wood-burning appliances, fireplaces, and solid fuel applications.

### Grease Duct Systems

Engineered grease duct systems designed for commercial kitchen exhaust applications.

## Milcor Access Solutions

Milcor specializes in access products designed for commercial and industrial construction projects.

### Roof Access Hatches

Commercial roof hatches designed for safe rooftop access and long-term weather resistance.

### Access Doors

Interior and exterior access doors designed for mechanical, electrical, plumbing, and maintenance applications.

### Floor & Sidewalk Doors

Heavy-duty access solutions engineered for commercial building and utility applications.
