

PRODUCTS

- ASME VIII rated expansion tanks, air & dirt separators, Triple-duty valves, suction diffusers, Buffer tanks, Etc.
- **Custom**-engineered ASME options
- Products sized from 2" to 32"
- Produced locally in Broken Arrow, OK

APPLICATIONS

- Chilled water loops, hot water systems
- Pump accessories, air removal, pressure stabilization
- Domestic water and hydronic systems

They offer rugged, USA-made hydronic accessories with dependable lead times and flexible custom options—backed by ASME certifications.

AMERICAN WHEATLEY

These intuitive, energy-efficient VFDs are **designed** for HVAC and Hydronics. They make it easy to reduce power consumption and fine-tune motor performance—without overcomplicating setup or support. Higher efficiency and lower harmonic distortion than competitors.

APPLICATIONS

- Cooling tower fans, AHUs, pumps, fans
- Energy Efficiency, demand matching design, Equipment life extension

PRODUCTS

- Optidrive™ VFDs for fans, pumps, and compressors
- HVAC-specific features and integrated controls

APPLICATIONS

- Boiler Venting
- Commercial kitchen exhaust
- High-temp generator venting
- Polypropylene venting

PRODUCTS

- Positive pressure vent systems
- Modular single and multi boiler stacks
- Gasketed, sealed joints for easy assembly

Security Chimneys delivers code-compliant, high-performance venting solutions for demanding mechanical room applications. Their modular systems and premium materials help streamline installs while ensuring safe, long-term operation.

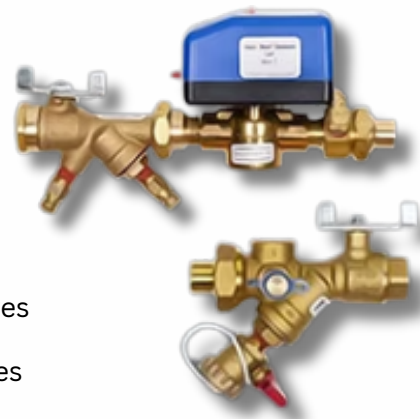

Hays packages performance and simplicity into every valve kit—automating hydronic balancing, maintenance-free for the life of the system. Provides complete solutions from terminal units to process systems. No more hunting for pieces!

APPLICATIONS

- Hydronic applications across commercial and industrial
- Fan coils, VAV boxes, unit ventilators & heat pumps
- Hydronic processes

PRODUCTS

- Mesurflo® automatic balancing valves
- Coil piping packages and hose kits
- Pressure-independent control valves

Need Help Sizing or Selecting?

Whether you're designing a new system or replacing an old one, we're here to help you size, select, and budget. From pricing to final specs, our team supports your project every step of the way.

PRODUCTS

- Wall, ceiling and duct-mounted gas sensors
- Controllers with BACnet/Modbus integration
- Personal Protective Monitors (PPE)
- Alarms for refrigerant, CO, NO₂, CH₄, H₂ and more
- One of the only lines with UL2075 Listed Sensors

Macurco's modular systems are code-compliant, scalable, and trusted across the industry for reliable gas detection in mission-critical spaces.

APPLICATIONS

- Equipment rooms with refrigerant or combustion risk
- Mechanical rooms, chiller/boiler plants, garages, grow rooms & healthcare

MACURCO
Gas & Refrigerant Detection

Their smart, fail-safe level controls are incredibly reliable, easy to install, and built to perform in harsh water —without the hassle of mechanical parts. 20 year maintenance free solution to water level detection.

APPLICATIONS

- Cooling towers, sump pits, storage tanks & wells
- Condensate tanks, water reuse systems

PRODUCTS

- Frequency-based solid-state water level controllers and sensors
- Relay outputs for pumps, alarms, fill valves
- No floats, no cleaning, no recalibration

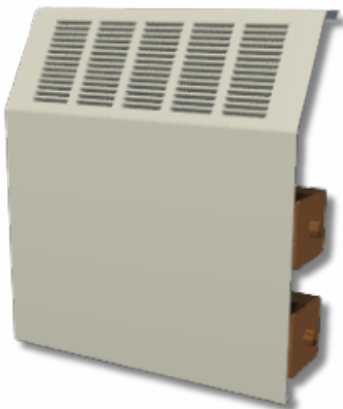

PRODUCTS

- Finned-Tube Radiant
- Hydronic & Electric Radiant Heat
- Terminal Units
- Baseboard Heating

APPLICATIONS

- commercial buildings
- Multi-family housing
- K-12 schools and universities
- Light industrial facilities
- Boiler/chiller plant systems

Sterling Hydronics simplifies system design with factory-assembled, plug-and-play solutions. Their quality components and customization capabilities help reduce install time and ensure long-term system performance.

Their energy-efficient, low-maintenance designs are built for performance in even the most sensitive environments—backed by intuitive controls and flexible installation options.

APPLICATIONS

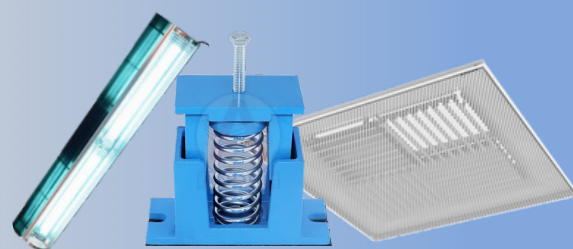

- Hospitals and surgical suites
- Museums and art galleries
- Laboratories and clean rooms
- Hotels, spas, and wellness centers
- Office buildings and data centers

PRODUCTS

- Resistive electric steam, Steam-to-steam, and Gas-fired humidifiers
- Condensate-free dispersion panels
- Integrated controls and BACnet compatibility

HVAC ACCESSORIES ONE-STOP-SHOP

PRODUCTS

- HVLS fans (6' to 24')
- Indoor and outdoor-rated units
- Direct-drive and gear-drive models
- Ceiling- and column-mounted options
- Fan controls and automation integrations

APPLICATIONS

- Warehouses and mechanic shops
- Gymnasiums and sports facilities
- Agricultural & Manufacturing
- Retail and commercial spaces

As the original inventor of HVLS technology, MacroAir continues to lead with whisper-quiet, energy-saving fans built for performance and reliability. Their products help improve comfort, ventilation, and HVAC efficiency across a wide range of buildings.

APPLICATIONS

- Rooftop units, air handlers, pumps, chillers
- Mechanical rooms, seismic zones, quiet spaces

Qmark's electric heating and ventilation systems are energy-efficient, durable, and built for dependable performance. Trusted across residential, commercial, and industrial applications, they provide consistent comfort and reliable operation in a wide range of environments.

QMARK®

A Division of Marley Engineered Products

Andre delivers engineered vibration isolation designed to perform in real-world HVAC applications. Their products are field-proven across a wide range of commercial & industrial projects, helping minimize equipment vibration, reduce structure-borne noise, and protect building integrity. By controlling vibration at the source, Andre supports quieter operation, longer equipment life, and improved overall system performance.

PRODUCTS

- Spring isolators
- Hangars/Isolation Hangars
- Inertia bases
- Rubber mounts
- All products can be restrained

APPLICATIONS

- Rooftop units, air handlers, pumps, chillers
- Mechanical rooms, seismic zones, quiet spaces

ANDRE

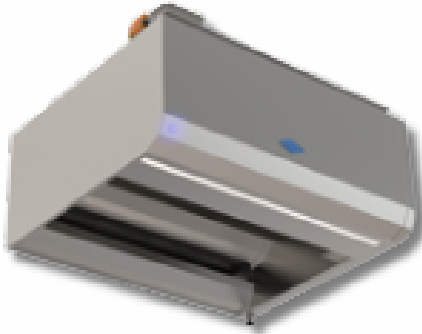

Vibration Isolation

PRODUCTS

- Custom-engineered kitchen hoods
- Energy-efficient smoke and pollution control units
- Demand Control Systems

APPLICATIONS

- Commercial kitchen exhaust
- Industrial and institutional facilities
- Tight mechanical rooms and multi-unit venting

Their engineered solutions help simplify code compliance, improve indoor air quality, and protect both people and property in demanding foodservice environments.

Deliver superior indoor air quality using proven bipolar ionization technology, trusted across homes, schools, offices, and industrial settings.

PRODUCTS

- Unit heaters (gas, electric, and hydronic)
- Convectors and fin tube radiation
- Cabinet unit heaters
- Make-up air units

APPLICATIONS

- Classrooms and school hallways
- Mechanical and storage rooms
- Warehouses and Offices

PRODUCTS

- UV-C lamps for air stream and coil disinfection
- High-output fixtures for RTUs and AHUs
- Retrofit kits with tool-free maintenance

APPLICATIONS

- Passive coil cleaning, IAQ improvement, pathogen reduction, preventative maintenance
- Hospitals, schools, offices, labs, and critical spaces

They combine powerful UV light disinfection with proven reduction in sick days, improved productivity & energy savings, delivering clean coils and clean air with minimal maintenance and no chemicals.

Combines rugged construction with flexible designs and fast availability. Their broad product range and proven reliability make them a top choice for quick-turn heating projects.

PRODUCTS

- Unit heaters (gas, electric, and hydronic)
- Convectors & fin tube radiation
- Make-up air units & Duct heaters

APPLICATIONS

- Classrooms and school hallways
- Mechanical and storage rooms
- Entryways and vestibules

APPLICATIONS

- Commercial buildings, hotels, hospitals & schools
- Renovation projects

PRODUCTS

- Fan Coil Units & Cassettes
- High wall, cassette, ducted, and console models
- EC motor options, smart controls, and sleek cabinet designs

With over 1,800 model configurations, Polar Air delivers unmatched flexibility and performance. Their fan coil units are quiet, efficient, and designed to blend seamlessly into any environment—perfect for both new construction and retrofit projects.
