Industrial Cooling Units

The ultimate in custom cooling performance, featuring integral packaged DX cooling tailored to specific industrial and institutional needs with high-efficiency designs and bespoke configurations.

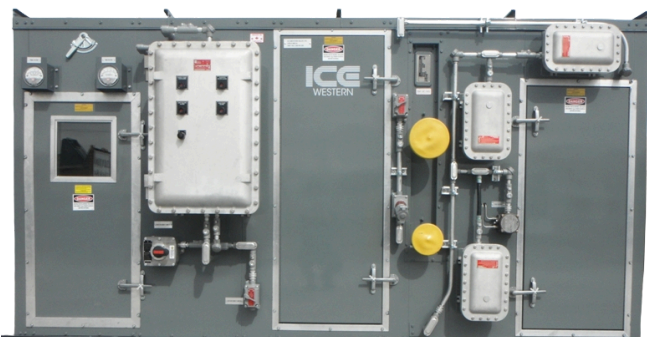

Make-Up Air Units (Indirect & Direct Fired)

Offers a quiet, serviceable, and highly efficient system with over 50 years of proven heater experience, providing custom heating and cooling solutions from 600 CFM to 170,000 CFM with tailored VAV and Multi-Zone options.

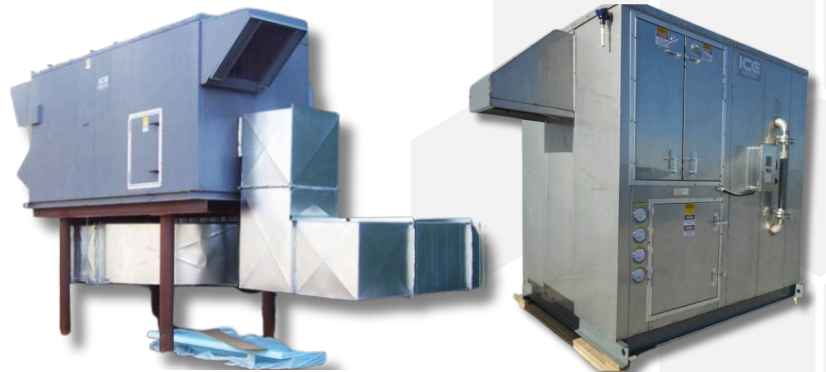

Custom Air Handling & Heat Recovery

The high-performance design utilizes advanced engineering to deliver bespoke air handling equipment with or without integral DX cooling, crafted to meet unique industrial requirements.

Explosion Proof & Hazardous Location HVAC

Designed to provide a safe, durable, and efficient system for hazardous environments, offering custom explosion-proof heating and cooling units with reliable operation in challenging conditions.

Scrubbers/Adsorbers & Desiccant Dehumidifiers

Reduce environmental impact and enhance air quality with a complete line of custom industrial scrubbers and dehumidification systems, leveraging over 50 years of process heater expertise for tailored solutions.
